Die psychologische Ursache der hypnotischen Erscheinungen

von

G. H. Schneider.

$2^1/_2$ Bogen 8. Preis 1 ℳ 20 ₰.

Der bekannte Psychologe, Verfasser des Werkes: »Der thierische Wille«, führt, nachdem es ihm gelungen ist, die meisten Hansen'schen Experimente nachzumachen, zum ersten Male alle Erscheinungen des sog. thierischen Magnetismus auf eine, durch die Manipulationen des Experimentators künstlich gesteigerte Eigenthümlichkeit des Bewusstseins zurück. Er erklärt so den Hypnotismus psychologisch, was gewiß von höchstem Interesse für diejenigen ist, welche die Erscheinungen des thierischen Magnetismus kennen gelernt haben.
